Floor stands:

- 1 Tube feet:**
 - **Function:** Easy to assemble, ultra-light and affordable structure
 - **Packaging:** ships in a cardboard tube
 - **Available with profile(s):** square
 - **Tips:** assemble 2 feet with the 2 vertical mounts with help from the T-clip. Connect the 2 poles and the higher horizontal tube with the corner clips. Place the T-clips left and right on the mounts at the desired height, then place the lower horizontal tube. Insert the graphic and adjust again the height of the lower horizontal tube.

- 2 Metal bases:**
 - **Function:** Add metal bases to your floor stand for more stability. The bases have a gray scratch-resistant textured finish
 - **Packaging:** ships in a cardboard tube & a small box
 - **Available with profile(s):** square
 - **Tips:** assemble the structure as mentioned above (with exception of the feet). Place the 2 bases on the floor. Screw the threaded insert onto the base. Insert it in the vertical display of the structure.

- 3 Self standing structure with one central vertical tube (or bar) on steel base:**
 - **Function:** available for small and mid-size dimensions.
