

## PRESENTATION OPTIONS

### Window fixture:

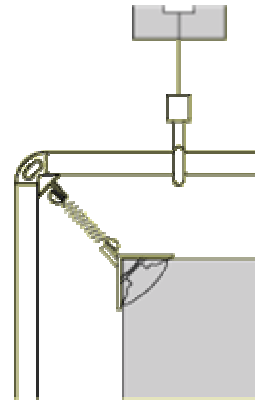

#### 1 Large suction cups:

- Function: Install your frames in windows on the suction cup's hook, simply and quickly
- Max format: 1m<sup>2</sup>
- Available with profile(s): square, round, rectangle
- Tips: stick 2 suction cups on your window; make sure it's clean and dry. Simply place the frame on the suction grip's hooks. Do not wet the suction grips if they risk being exposed to the sun. Use a leveling tool to align.

#### 2 Adjustable hooks:

- Function: : Attach your frames reliably and quasi-permanently with the suspension kit with adhesives. Adjustable height
- Max format: 2m<sup>2</sup>
- Available with profile(s): square, round, rectangle
- Tips: Stick the square part of the kit on top of your window. Adjust the height of the hook. Install the frame on the hooks. Use a leveling tool.

#### 3 Small suction cups:

- Function: Great for small dimensions. Easy installation
- Max format: 0,5m<sup>2</sup>
- Available with profile(s): round, rectangle
- Tips: Once the frame is assembled, place a suction cup in each corner with help from the plastic pins. Place the display on your window (make sure it is clean and dry). Use a leveling tool.
